

TRAINING

ABOUT US

CTI is a US-based software development, systems integration, and training services company specializing in the open, government-owned TAK and RaptorX 3D mapping applications designed to support mission planning, multi-level situational awareness, multi-int sensor command and control (C2), and post-mission data processing.

TRAINING OVERVIEW

Our team's combined experience utilizing TAK and RaptorX within Special Operations and Electromagnetic Spectrum Operations is second to none. CTI's support technicians can rapidly develop and deliver customized curriculum, facilitate field training exercises, and support effective deployment during live operations as required.

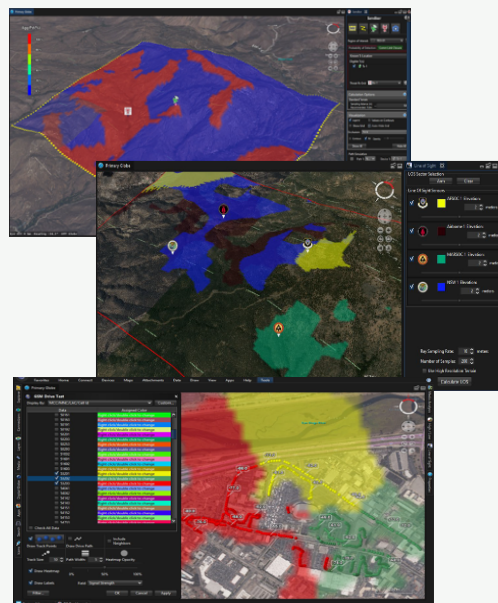

TRAINING & SUPPORT SERVICES

- *Basic, intermediate, and advanced TAK & Raptor courses
- *TAKServer setup & administration
- *Customized curriculum to suit your needs
- *Field exercise assistance

PLATFORMS

The most most robust, widely adopted and deployed, open, government-owned situational awareness platform in the world.
